### Energy rebates still available for San Marcos residents

Didn't get in on the state appliance rebate reservation system? Don't panic! The City of San Marcos still has plenty of funding available for appliance rebates, as well as for heating/air conditioning rebates for San Marcos residents.

"The City appliance rebate program is separate from the state program, although both are being funded by federal stimulus dollars. The City program does not have a specific timeline, and you do not have to get on a reservation list. You DO need to have a free City energy audit BEFORE purchasing your new appliances" said Jan Klein, Conservation Coordinator for the City of San Marcos.

The Energy Efficient Appliance Rebate Program is open to City of San Marcos residents who upgrade old inefficient home appliances to energy-efficient models. Rebates are available for:

- Refrigerators
- Dishwashers
- Clothes washers
- Water heaters
- Window AC units

The Energy Efficient Heating/AC Rebate Program is funded through local electric utility rates and is open to City of San Marcos residential electric utility customers. Rebates are offered for the following:

- Replacing central heat/AC systems with efficient models
- Adding attic/wall insulation
- Sealing duct systems
- Installing radiant barrier
- Installing programmable thermostats

Neither of the programs has income limitations.

For more information on rebate programs please visit the City of San Marcos website at [sanmarcotx.gov/electric](http://sanmarcotx.gov/electric) or contact Jan Klein, Conservation Coordinator, at 393-8310.
